

**Focus on your
future**

Who are we, what do we do?

Assured Learning Australia provides high quality, hands on technical training to support the needs of the automotive industry.

We have developed a range of short courses that have been specifically requested by the industry to develop the skills of technicians who diagnose vehicle system faults whilst also preparing them for future technological advancements.

ADVANCED MULTIMETER DIAGNOSTIC TECHNIQUES

Most vehicle technicians have a multimeter in their tool box that they use to measure voltage. Voltage measurement is only one part of a modern multimeters capability and is limited on its own to accurately locate vehicle faults.

These courses are aimed at motor vehicle technicians of all levels from infrequent users to those who want to learn more advanced techniques to help diagnose faults quickly and more accurately. The knowledge, skills and techniques learnt on these courses can be put into practice the very next day.

Electrical system faults , Set up for testing, fault finding techniques, common circuit testing: batteries, starter circuits, charging systems and lighting systems, advanced multimeter functions and diagnostic techniques, sensor and actuator testing.

Cost:

\$300 plus GST

When:

8:00am – 4:00pm

Included:

Lunch & Refreshments
Course Notes

How to book:

Contact us below
