

**Focus on your
future**

Who are we, what do we do?

Assured Learning Australia provides high quality, hands on technical training to support the needs of the automotive industry.

We have developed a range of short courses that have been specifically requested by the industry to develop the skills of technicians who diagnose vehicle system faults whilst also preparing them for future technological advancements.

AUTOMOTIVE SCAN TOOL DIAGNOSTICS

Diagnostic scan tools are more than just code readers, they can provide detailed information about vehicle operating conditions when they are used correctly.

This course will provide you with the skills and knowledge to be able to use your Scan Tool to its full potential; to understand when and why fault codes are logged and to use them along with live system data to aid the diagnosis of vehicle faults. Bring your own Scan Tool along if you wish.

Areas covered will include: Understanding when and why fault codes are logged, error memory interrogation, live data and freeze frame analysis, exhaust emission monitoring, misfire detection, drive cycles, sensor and actuator testing, fault-finding techniques and how to diagnose faults with no fault codes present.

Cost:

\$300 plus GST

When:

8:00am – 4:00pm

Included:

Lunch & Refreshments
Course Notes

How to book:
