

AUR20220 Certificate II in Automotive Air Conditioning Technology

Course information

This highly practical course is for individuals who are required to perform a range of tasks relating to the service and repair of automotive air conditioning systems on cars, heavy vehicles, plant and agricultural machinery.

The air conditioning component is delivered over two days, where you will learn the principles of operation of air conditioning and HVAC systems and refrigerant handling safety. You will get practical hands-on experience servicing and repairing air conditioning systems as well as spending time covering system diagnostic techniques using our purpose-built training aids and comprehensive selection of air conditioning tools and equipment.

Entrance requirements

To qualify for this course delivery, you must hold an Australian automotive trade qualification or equivalent, be an apprentice with the following units or be working in the motor industry and have considerable experience. Once enrolled you must apply and pay for a trainee (classroom) refrigerant handling licence from the Australian Refrigeration Council (ARC), we can assist you with the application.

Course outline

There are 13 units that make up the qualification, the air conditioning units that are covered during the two (2) days are:

AURETU102	Recover vehicle refrigerants
AURETU103	Service air conditioning & HVAC systems
AURETU104	Diagnose & repair air conditioning and HVAC systems

The below are covered by recognition of prior learning (RPL) or credit (CT) depending on your trade stream:

AURAEA002	Follow environmental and sustainability best practice in an automotive workplace
AURASA102	Follow safe working practices in an automotive workplace
AURETR112	Test & repair basic electrical circuits
AURTTA118	Develop & carry out diagnostic test strategies
AURAF A002	Read & respond to automotive workplace information
AURAF A103	Communicate effectively in an automotive workplace

Automotive mechanical trade stream:

AURTTA104	Carry out servicing operations
AURTT C103	Diagnose & repair cooling systems
AURTT E104	Inspect & service engines
AURTT K102	Use & maintain tools & equipment in an automotive workplace

Automotive electrical trade stream:

AURETR006	Solder electrical wiring & circuits
AURETR011	Install basic ancillary electrical systems & components
AURETR125	Test, charge & replace batteries & jump-start vehicles
AURETR132	Diagnose & repair automotive electrical systems

Fees & charges

The cost of the course is \$1300 GST exempt which includes: course notes, lunch and refreshments.

If RPL is required, a fee of \$50 per unit applies (maximum \$500 for all 10 units). This payment covers the RPL assessment, including an interview with one of our trainers prior to the course.
