

**Focus on your
future**

Who are we, what do we do?

Assured Learning Australia provides high quality, hands on technical training to support the needs of the automotive industry.

We have developed a range of short courses that have been specifically requested by the industry to develop the skills of technicians who diagnose vehicle system faults whilst also preparing them for future technological advancements.

AUTOMOTIVE FORCED INDUCTION SYSTEMS

This course covers all aspects of forced induction and how it fits into the engine management and emission control systems. Operating principles are covered followed by testing and advanced diagnostic fault finding techniques.

Types of forced induction includes: turbochargers, superchargers, combination turbocharger/supercharger (TSI) systems, electric turbochargers etc.

The course will provide you with an in-depth understanding of automotive forced induction systems and diagnostic fault finding techniques.

- Function and operation of forced induction system components.
- Diagnostic testing of forced induction electronic management systems.
- Testing using pressure gauges, multimeters, oscilloscopes and scan tools.
- Analysis and interpretation of test results.

Prerequisites:

There are no entry requirements to enroll on the course.

Cost:

\$300 plus GST

When:

8:00am – 4:00pm

Included:

Lunch & Refreshments
Course Notes

How to book:
